DETAILED ACTION

1. Applicant's election of species I, claims 1-4 and 10-18 without traverse for prosecution and cancellation of claims 5-9 on 11/26/02 are acknowledged.
2. Claims 1-4 and 10-18 are pending.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 12/05/01 and 05/20/02 were filed on and after the mailing date of the Application on 12/05/01. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1, 10, and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al., U.S. Patent No. 6,454,816.

Regarding to claims 1 and 10, Lee et al. discloses a carbon nanotube (CNT) and a method of making a carbon nanotube similar to what recited in claims 1 and 10. Lee et al. discloses the carbon nanotube comprising a substrate, a carbon nanotube layer deposited on the substrate, and the carbon nanotube layer includes potassium. It would have been inherent that potassium belongs to Group I metal or alkali metal.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2-4 and 11-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al., U.S. Patent No. 6,454,816.

Regarding to claims 2-4, 11-13, 16-18, it would have been obvious in the art that alkali metal can be either deposited, doped, or intercalated with the carbon nanotube.

Regarding to claim 14, it would have been well known in the art that a conductive layer is being deposited between the substrate and the carbon nanotube layer.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed in PTO-892 also disclose the carbon nanotube including the carbon nanotube layer and the nanotube layer is capable of intercalated alkali metal.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao P Le whose telephone number is 703-605-1187. The examiner can normally be reached on M-T (8:00-6:30).
